PHYC40950

Space Sector Internship Briefing

**MSc Space Science &
Technology**

**Prof. Lorraine Hanlon
28/04/2026**

Reminder: This is a 30ECTS module meaning 500-600 hours of student effort, approx. equivalent to 40 hours per week for 12 weeks

Your internship can run for longer, but we need you to be able to write up a report with initial results and present a poster at the end of August so we can assess you.

Make sure you talk to your supervisor to ensure you have enough to present at the end of August – for example divide the project into work packages with defined outcomes that can be reported on.

After the poster session you can then continue your internship

- Assessment
- Writing the final report
- Timelines
- Q&A

- Continuous Assessment by Employer/Internship host – 30%
- Final report (~25pages) – 50%
- Poster presentation – 20%

I will be your main UCD point of contact during the internship but you will be assigned a UCD mentor who will check in on you during the project

Any problems, you can contact me, or your mentor, or Paul Murphy

Continuous Assessment - Host

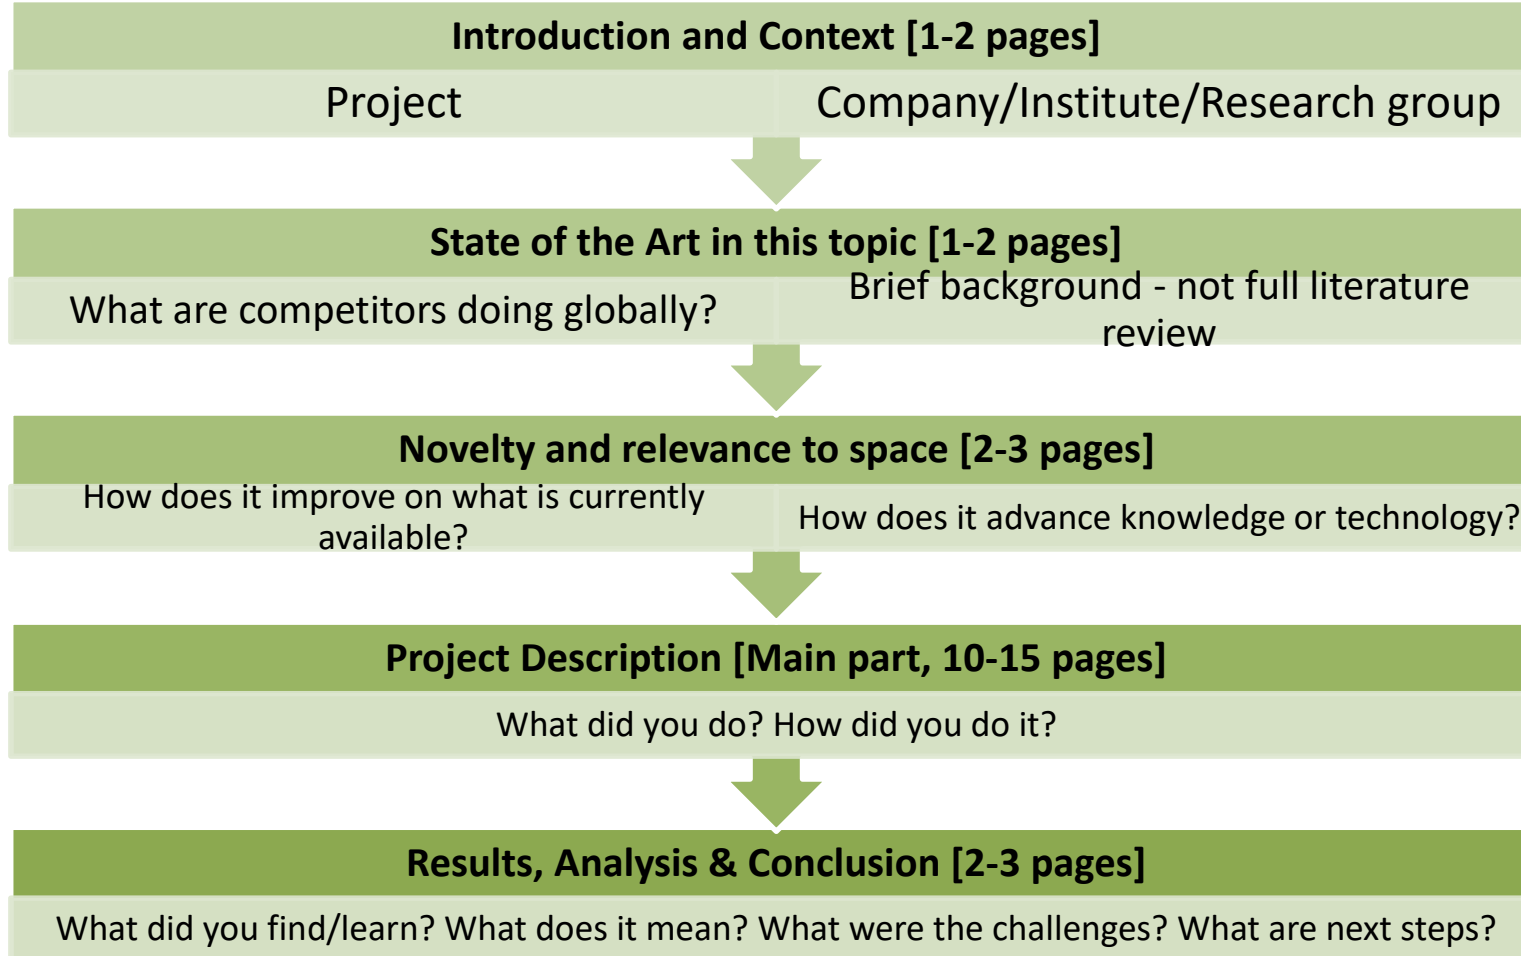

Evaluation Item	Rating					
	5	4	3	2	1	0
General Quality of Work						
Dependability						
Contribution to Team						
Productivity						
Communication Skills						
Technical Knowledge						
Other (please specify)						

5	Excellent
4	Very good
3	Good
2	Satisfactory
1	Marginal
0	Inadequate

What are the student's strong points?

What areas or skills could benefit from further development?

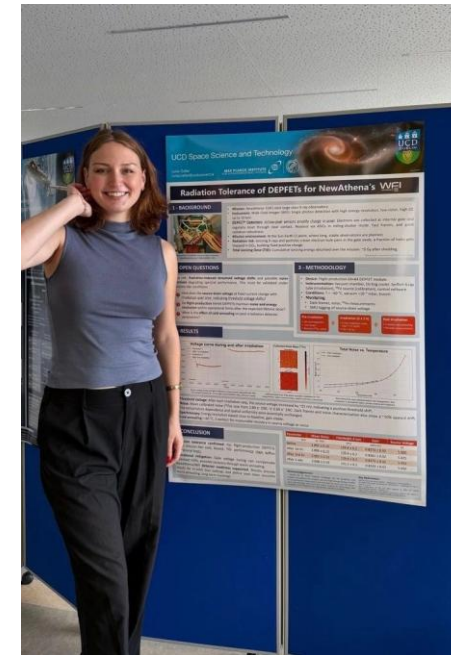

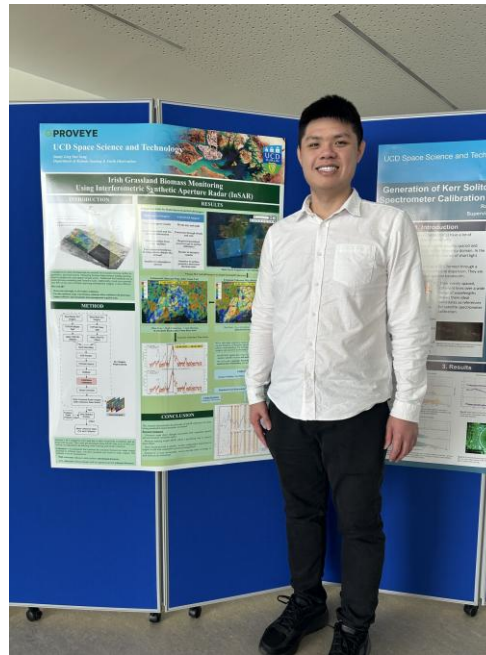

The style of your report will depend on whether it is industry-based, or research-based
Broadly, your report [max 25 pages] should address the following [page numbers are rough guidelines only; each project will be different]

You may include additional plots, tables of results, code etc, in Appendices which are not included in the 25 page limit.

- Be writing parts of your report throughout the internship – outline chapters in bullet points and build up content gradually from there
- **Emphasise the space context**
- Maintain conversation with your supervisor throughout the internship about what should be in the report
- Agree a timeline for your supervisor to review the report well in advance of the deadline, to allow time for their feedback
- In case of Intellectual Property issues we can arrange a non-disclosure agreement
- Detailed guidelines will be posted on Brightspace
- Report deadline is 5pm on **August 25th**
- Submit as a pdf on Brightspace
- **Use of AI must be declared and described** (e.g. prompts used, tools used, scope of use) on your 'Statement of Authorship' cover page)
- Failure to do so may negatively impact your grade

- Poster files to be uploaded to google drive **by 9am on Tuesday August 25th**
- Portrait PDF/A0 format only
- School will pay for printing of all posters received by then
- Guidelines & link will be posted later on Brightspace
- **In-person event in UCD on Friday, August 28th** – everyone must be there
- Set up from 09:00am; poster session runs from 09:30am to 1pm
- Invite your supervisor along
- The MSc external examiner, Prof. Matt Griffin from the University of Cardiff, aswell as UCD staff, will be there to talk with you about your project. Prepare your ‘elevator pitch’!
